

Agricultural Services

Veracity Aviation offers an array of services to help you manage your deer and wildlife populations; from game counts, photography and hunting depreddating animals such as feral hogs, bobcats, red fox and coyotes. Whether it is for your own land or hunting lease, having a good count performed on your herd and assessing the size and health is vital information for deciding how to manage your game leases.

Services that are provided are:

Photography

Livestock Gathering & Culling

Property Surveys

Game Counts

In order to provide aerial game services, an Aerial Management Permit is required by the Texas Parks and Wildlife Department. Our permit number is M-302 and our approved pilots are listed for your service. In order to perform a count or a hunt for depredating animals, a Landowner authorization (LOA) is required to be signed by the or authorized agent authorizing the specific type of operation to be conducted on the specified property. We will help you out with all the paperwork and make it very painless for the landowner.

Helicopters

Seats one pilot and one passenger
